

## **Game Design & Development I**

**CGR 125**

**Professor Ryan Morrison**

### **Game Analysis 8 (Professional Review)**

#### **Purpose**

- Review any PC or console title in the format of a professional reviewer. The article must be formatted in that of a professional review.

#### **Instructions**

- Acquire any title for PC or current consoles that have been published during the current semester. It is recommended that a non-adventure, non-RPG be chosen for this assignment.
- For the analysis, review the game as if a gaming site or magazine has hired you is accepting submissions. Make certain all aspects of the game are touched on: This includes the aspect of play to user interface.
- You will need to create a specialized format for the article as well. Please create a set up to include pictures and the text in a way where it is easy and fun to read.
- A Rating system should also be created or included and to please be creative.
- Make sure to include your opinion (finally, I know) but to ensure your opinion is based on your newer knowledge of what it takes to make a game and not the “player” side of your brain.
- Compare your games to recent or notable hits that the game would be compared to.
- Upon completion of this article please submit it to the campus newspaper as well. The email address will be posted in the forums with what required information is needed for submission.
- This also means your paper should be read and re read several times and you may create several drafts to ensure your GUM is acceptable.

This papers requirement is slightly different than your normal submissions to me.

- It must be at least 3 pages double spaced in length, no more than 5 pages.
- 12-14 point font in a legible font selection.
- Please include art-borrowing it from the official site is welcomed/encouraged for optimal effect.
- The assignment is due at the beginning of week 12 in printed form.
- A copy with images should be posted in the Game review section
- A submission to the school paper is also required ( I should be CC'd as well in the email)
- Questions will be answered up to week 11
- This is not an optional assignment and carries a greater weight than your previous GA's.
